

# Diversified CPC International

DIVERSIFIED CPC INTL  
Registered to ISO9001  
Certificate No. A5410

GLOBAL SUPPLIER OF

AEROSOL PROPELLANTS · FOAM EXPANSION AGENTS · ALTERNATIVE FUELS  
SPECIALTY PRODUCTS · HIGH PURITY HYDROCARBONS · NATURAL REFRIGERANTS

## FUTURE OF CONTINUED SUCCESS

As a recognized global leader, Diversified CPC International supplies the world market with the highest quality aerosol propellants, foam expansion agents, alternative fuels, specialty products, high purity hydrocarbons, and natural refrigerants available. Our superior technology and customer-driven approach provide a unique competitive advantage that forms the mainstay of our continual success.

Hydrogenation

## EXCLUSIVE "TRIPLE PLAY" TECHNOLOGY

Diversified CPC International pioneered the use of **Hydrogenation** technology for the production of hydrocarbon aerosol propellants.

Utilizing a proprietary catalytic reactor, hydrogen and unsaturated hydrocarbons are combined, complex sulfur compounds are broken down, and oxygenates like TBA and TBHP are removed.

Direct Pipeline Connection

Diversified CPC International has a **Direct Pipeline Connection** with the 2<sup>nd</sup> largest U.S. oil refinery and has **Fractionation** processes to be able to utilize various gas streams from around the world.

Fractionation

The result of this breakthrough technology is a chemically stable, environmentally acceptable, naturally superior product, which makes Diversified CPC International the most dependable supplier in the industry.

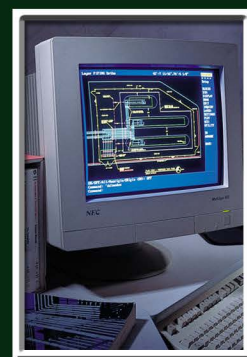

## TECHNICAL, ENGINEERING AND REGULATORY SERVICES

Progressive engineering and leading technical abilities provide critical support throughout all phases of production. Advanced analytical laboratories, rigorous quality assurance testing and top notch technical personnel combine to deliver high quality products formulated to fit customer specifications.

Our engineering and construction professionals can design and install turnkey processes for storage and handling of liquefied gases and solvents.

We can also assist you in the design and implementation of various Process Safety & Risk Management programs ensuring EPA/OSHA compliance.

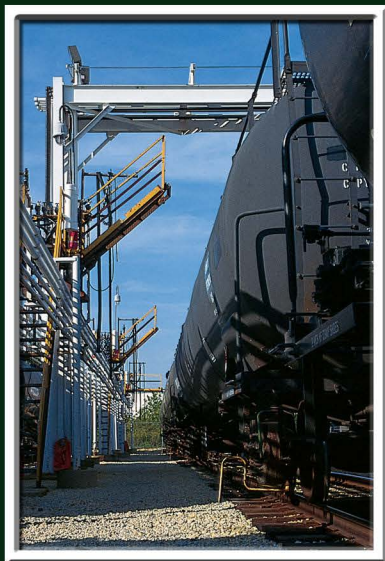

Our petroleum and chemical engineers use the latest in CAD technology and software to develop storage and material flow solutions for your on-site locations.

## TRANSPORTATION

Products are delivered in railcars, cylinders, portable tanks, truck transports, and ocean containers. Diversified CPC International maintains an extensive fleet of railcars and transports for distribution throughout the United States and Canada. Railcars, transports, and containers are dedicated to assure maximum product purity.

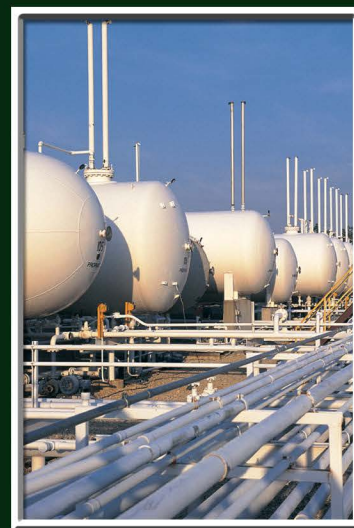

Various sizes of railcars, transports, and containers are available to meet individual customer requirements.

Trucks and railcars are strategically located across the United States to assure prompt delivery and reduce shipping time.

**Diversified CPC International, Inc.**  
does not manufacture products containing  
CFC's which deplete the ozone layer. It is our  
mission to offer the most environmentally safe  
products possible.

## VENDOR MANAGED INVENTORY SYSTEMS

We create supply chain management strategies to your specifications. Systems from basic to full telemetry. Full telemetry systems include: wireless tank monitors, internet viewing of tank levels and history, automatic replenishment and summary billing.

## SUPERIOR PRODUCTS

The following products are manufactured and/or custom blended by Diversified CPC International to precise customer specifications for vapor pressure, composition, and purity.

- ° Hydrocarbons from 17 to 108 psig
- ° Dimethyl Ether (DME)
- ° 1,1 Difluoroethane (152a)
- ° 1,1,1,2 Tetrafluoroethane (134a)
- ° n-Pentane
- ° Isopentane

\* Distributor for DuPont Dymel® Propellants

## OTHER PRODUCTS INCLUDE:

High Purity C<sub>3</sub> and C<sub>4</sub> Hydrocarbons  
Specialty Chemicals -

- ° Solkane® 365mfc Solvents
- ° Vertrel® Specialty Fluids
- ° trans 1,2 Dichloroethylene

\* Diversified CPC can produce UL classified Propane and Isobutane, for those manufacturers producing equipment to the UL471 standard.

## BUILDING A WORLD-CLASS LEADER

Diversified CPC International, Inc. has grown rapidly to become the world's leading supplier of aerosol propellants and a trusted source of energy market knowledge. Based on exclusive hydrogenation technology, Diversified CPC's propellant is the most stable, pure and consistent product available. We ensure high quality from the very beginning, when liquefied petroleum gas is provided by direct access from the well head or the refinery. After processing, quality is then certified with a Certificate of Analysis that travels to customers with every shipment by Diversified CPC dedicated tank trucks and rail cars.

### *Facilities*

Diversified CPC International's corporate headquarters and flagship manufacturing facility was built in Channahon, Illinois in 1982. In 1988, extensive modernization was completed, centering on the installation of an exclusive hydrogenation process and on-line quality control sampling devices. Equipment to expand the company's raw material base, additional storage tanks, vapor recovery unit, and in-line blending capabilities were also added. A dedicated pipeline connection (built in 1998) with the second largest refinery in the United States - ensures our customers uninterrupted supply. A two tower fractionation system was added in 2004, designed to separate various fractions of LP Gas and produce High Purity Hydrocarbons (>99.5%). Diversified CPC has continued our expansion in 2009 with the construction of additional fractionation capabilities with the addition of three more distillation towers designed to produce Ultra High Purity Hydrocarbons (99.99%). Additional production facilities are located in Sparta, New Jersey, Anaheim, California, and Petal, Mississippi. Advanced distribution terminals include Miami, Florida, serving the Carribbean and Ajax, Ontario, serving Canada.

### *Our Future*

Today, Diversified CPC International can supply the total product needs for the aerosol industry from coast to coast, delivered in our own rail cars and tank trucks. The combination of these capabilities and our commitment to continuous improvement has positioned Diversified CPC International, Inc. as a world-class leader. We are committed to the industry. We promote cleaner alternatives, and will continue to provide our services, resources, and technology to meet the challenges and demands for a "greener" tomorrow. We are also committed to providing a superior product, one that is high in purity and environmentally acceptable, and in providing a safe clean respectable workplace for our employees.
