Unmatched Technology & Resources

Diversified CPC uses hydrogenation technology and sophisticated fractionation processes to produce hydrocarbons of varying chemical grades, up to and including 99.999% purity. The result is high performing, chemically stable, cost-effective, and environmentally acceptable products that are used in a multitude of applications from consumer products and electronics to refrigerants and fuel.

We have a direct pipeline connection to Exxon Mobil's Joliet refinery, as well as the ability to produce and store large quantities of product throughout the country. We also partner with Fortune 500 chemical companies to offer a comprehensive line of solvents and propellants for aerosol and specialty chemical applications.

Value-Added Offerings

We offer an array of value-added services to help ensure clients meet their safety and operational goals. Diversified CPC's offerings include, but are not limited to, the following:

- Engineering Design • Turnkey Construction • Quality Assurance
- Liquefied Gas Storage and Handling Systems • System Commissioning/Decommissioning
- System Conversion • Decontamination • Safety & Operational Training • Safety Audits

Superior Service

Producing high quality hydrocarbons is only part of the equation. Diversified CPC products are supported by experienced chemists, engineers, safety and regulation experts, top-notch customer service professionals, and a dependable transportation team with an extensive fleet of trucks and rail cars. Our goal is to provide superior service every step of the way - from initial inquiry to product delivery and beyond. Through this customer-centric approach, we've built long term relationships with some of the world's best-known companies.
