Diversified CPC Int'l

Engineering Services

Diversified CPC collaborates with clients to design, build, and realize manufacturing processes that are safe, efficient, and economical. Our extensive experience with liquefied gases and liquids uniquely qualifies us to address your distinct needs. From building storage and handling systems to conducting safety audits and training, you can depend on our staff of qualified professionals to help you achieve and maintain operational excellence.

Turnkey Construction

- Liquefied Gas/Solvent Storage and Handling Systems/Recovery Systems
- Compounding Rooms

Design

- Engineering Design
- Drafting
 - CAD - 3D Process

System Management

- Commissioning, Decommissioning
- Container Decontamination
- Tank Conversion

Safety

- Safety & Operational Training
- Safety Audits
- Leak Detection

Propellant Training

Safety, operations, and maintenance training designed to address the unique needs of propellant operations.

DCPC/ES/4.1

The Diversified Difference

Diversified CPC International is a global leader in the production of the highest quality specialty gases, aerosol propellants, alternative fuels, NGL refrigerants, and foam blowing agents. In addition to providing quality products, we maintain an unprecedented focus on client satisfaction and offer an array of value-added services. Diversified CPC provides safety and operations consultation, storage tank sales and installation, and supply chain management to help clients meet their safety and operational goals.
